Ira A. Fulton Schools of Engineering - Arizona State University
Bachelor of Science - BS, Computer Science (GPA: 3.9)

Expected 05/2027

Relevant Coursework:

Data Structures and Algorithms • Information Assurance • Prob & Stats Engineering Problem Solving • Principles of Programming • Object-Oriented Program & Data • Computer Organization and Assembly Language Programming • Intro to Programming Languages • Theoretical Computer Science • CALC I/II/III, Discrete Math, Linear Algebra

Technical Skills & Languages:

Frontend: React.js, Next.js, Node.js, Vue.js, Tailwind CSS, JavaScript/TypeScript, HTML/CSS

Backend / Data / ML: Python, Java, C, C++, SQL, PySpark, Jupyter Notebooks, TensorFlow

Tools & Workflows: Git/GitHub, Palantir Foundry, Dataiku, Jira, Excel, Bash, Microsoft Teams, Power BI

WORK EXPERIENCE

AbbVie Inc., Data Engineering Intern - (remote)

05/2025 - 08/2025

- Engineered brand indication features for ML powered OUS medical Sales Pre-call Planner in Palantir Foundry by implementing PySpark transformations, delivering standardized ML-ready datasets.
- Partnered with data scientists and analysts to define feature requirements and data contracts, participated in Scrum ceremonies with European teams to align scope and remove blockers.
- Deployed production changes via pull requests to big-data pipelines, following Git best practices and peer code reviews while coordinating handoffs with cross-timezone teams.

AbbVie Inc., Data Engineering Intern - North Chicago, IL

06/2024 - 08/2024

- Engineered SQL-based ETL pipelines to extract US sales data from multiple sources, transformed to standardized new variables, reducing manual preprocessing to efficiently support accuracy of downstream reporting
- Automated end-to-end data processing workflows using Dataiku and SQL, streamlining data ingestion and transformation tasks to leverage accurate, up-to-date datasets for targeted healthcare provider marketing
- Applied data engineering and integration techniques with Dataiku and relational databases to unify healthcare datasets, improving accessibility and reliability for analytics teams, supporting faster data-driven decision-making

Waterwell Irrigation Inc., Crew member, Junior Irrigation Technician - Montreal, QC, Canada

09/2020 - 08/2021

- New installation, troubleshooting, repairs & maintenance on residential and commercial irrigation systems
 - Trained for promotion to work independently while adhering to strict safety rules for electrical and water systems
 - Collaborated with team members and customers in both English and French to complete projects on time within client specifications, strengthening teamwork, communication, and problem-solving skills.
-

PROJECTS

Personal Website, Developer - Tempe, AZ

09/2025

- Rapidly learned Vue.js and built a personal website using a modular, component-based architecture with responsive Tailwind CSS styling, designed for scalability and future feature expansion.
 - Version-controlled and continuously updated the site through GitHub, enabling streamlined iteration, collaboration readiness, and reliable tracking of feature development.
 - Designed and implemented a blog with dynamic Vue routing to share computer science and AI-focused articles, demonstrating technical communication skills and initiative in knowledge sharing.
-

LEADERSHIP

ASU Men's Club Water Polo, Board Member - Travel Manager and Athlete

2023 - Present

- Lead travel operations for a collegiate club; manage a five-figure budget for travel, lodging, registration; preparing estimates and attending in-person application to ASU for funding requests; accountable for compliance, reporting, and maintaining audit-ready records.
